

ResearchID: Como criar seu perfil

Biblioteca Prof. Achille Bassi
ICMC

ResearcherID

ResearcherID é uma ferramenta criada pela Thomson Reuters para solucionar o problema da ambiguidade do nome do autor dentro da área acadêmica, além disso propicia visibilidade internacional ao pesquisador e seus trabalhos e identifica pesquisadores que possuem linhas de pesquisa similares. Permite, também, construir um perfil de seus trabalhos acadêmicos, visualizar o índice H e o índice de citações bem como o mapa de relacionamento de pesquisadores, instituições, países, ano de publicação etc.

Como criar seu perfil no ResearcherID

- Caso não seja cadastrado, preencher os campos obrigatórios (*):
Utilize seu e-mail institucional
- Clique em “Submit” para enviar os dados

The screenshot shows a web browser window with the ResearcherID registration form. The browser's address bar shows 'Apps' and 'Importado do Firefox'. The page title is 'RESEARCHERID'. Below the title, it says 'Thank you for your interest in ResearcherID!'. The main content area contains a registration form with the following fields and instructions:

To register with ResearcherID.com, complete the * required fields below. We will e-mail you registration invitation link.

First Name: *

Last Name: *

E-mail: *

Note: ResearcherID.com will contact you using the email address. This will be kept private by default.

How did you hear about us? Select an Option: *

Below the form, there are two buttons: 'Submit' (blue) and 'Clear' (grey). A blue arrow points to the 'Submit' button.

At the bottom right, there are links: [Community Forum](#) | [Register](#) | [FAQ](#) | [Support](#) | [Privacy Policy](#) | [Terms of Use](#).

At the bottom left, it says: © COPYRIGHT 2015

Como criar seu perfil no ResearcherID

- Acessar o e-mail indicado e confirmar o cadastro copiando e colando a URL no browser

Thank you for your interest in joining ResearcherID!

Copy and paste this link into your browser to complete the registration process:

<http://www.researcherid.com/VerifyURL.action?id=Bi%2B9fB0KdEONWDkEModiw%2BcL4up7A8ZnBBIEbI54nhY0uQGGAxwvnA%3D%3D>

As a registered member, you can:

- Manage your publication list and showcase your work
- Track your times cited count and h-index
- Identify potential global collaborators
- Avoid the common problem of author misidentification

Because ResearcherID integrates with Web of Science* and EndNote online, you can claim your publications quickly and content you have produced attributable to you in a search environment that is relied upon by more than 20 million re

Additionally, you can associate your ResearcherID account with your ORCID account.

If you have any questions about the registration process, please contact the Thomson Reuters IP & Science Global Sup address cannot accept replies.

* Although ResearcherID.com is accessible from any computer, features integrated with Web of Science require you to

Kind Regards.

My Publications

To add publications to your Publication List, select one of the options below by clicking a link.

Note: Depending on your permission to access *Web of Science™* and *Web of Science™ Core Collection*, you will have one or more of the following options:

3 Opções

1ª - Publicações indexadas na Web of Science

2ª - Publicações armazenadas no EndNote

3ª Publicações indexadas em outras bases

Option 1:

WEB OF SCIENCE™

Search Web of Science

Use this option to search *Web of Science*. Depending on your subscription, this can include articles, books, patents, and more.

Search Web of Science Core Collection

Use this option to search *Web of Science Core Collection*. Depending on your subscription, this includes the world's leading scholarly literature in the sciences, social sciences, arts, and humanities and proceedings of international conferences, symposia, seminars, colloquia, workshops, and conventions.

Search Web of Science Core Collection Distinct Author Sets

Use this option to search *Web of Science Core Collection* for sets of articles written by the same person.

Option 2:

ENDNOTE™

Go to EndNote

Use your EndNote account to add articles and manage your ResearcherID publication lists.

Already use EndNote? You can transfer your ResearcherID publication lists between the desktop and web effortlessly. Learn about the additional features available in EndNote to accelerate your research including find full text automatically and access to over 3,700 publishing styles.

Search Online Resources using EndNote

With EndNote, you can collect references from online resources including PubMed and more.

- [Help/Tutorials](#)
- [Learn more at EndNote.com](#)

Option 3:

Upload RIS file.

Upload an RIS file (from EndNote, RefMan or other reference software)

You can upload an RIS formatted text file. The RIS file format is a tagged format for expressing bibliographic citations.

The screenshot shows the ScienceDirect website interface. At the top, there are navigation links for 'Journals', 'Books', and 'Shopping'. Below these, there is a search bar and a 'Download PDF' button. The main content area displays a citation for 'Euglena-based neurocomputing on swimming' by Kazunari Ozasa. The citation includes the Elsevier logo, the title, the author's name, and the DOI: 10.1016/j.asoc. Below the citation, there is an 'Abstract' section. A green box highlights the 'Export' button in the 'Export file' section, and a green arrow points to it from the left. The 'Export file' section also includes options for 'RIS (for EndNote, Reference Manager, ProCite)', 'BibTeX', and 'Text'. The 'Content' section includes options for 'Citation Only' and 'Citation and Abstract'.

Euglena-based neurocomputing on swimming
Kazunari Ozasa^{a,*}

Abstract
We report on a novel neurocomputing model based on the swimming activity of *Euglena* cells, in which two-dimensional optical feedback is applied using the Hopfield-Tank algorithm. Trace momentum, an index of swimming activity of *Euglena* cells, is used as the input/output signal for neurons in the neurocomputation. Feedback as blue-light illumination results in temporal changes in trace momentum according to the photophobic reactions of *Euglena*. Combinatorial optimization for a four-city traveling salesman problem is achieved with a high occupation ratio of the best solutions. Two characteristics of *Euglena*-based neurocomputing desirable for combinatorial optimization are elucidated: (1) attaining one of the best solutions to the problem, and (2) searching for a number of solutions via dynamic transition between the best solutions. Mechanisms responsible for the two characteristics are analyzed in terms of network energy, photoreaction ratio, and dynamics/statistics of *Euglena* movements. The spontaneous fluctuation in input/output signals and reduction in photoreaction ratio were found to be key factors in producing characteristic (1), while the photo-insensitive *Euglena* cells or the accidental evacuation of cells from non-illuminated areas causes characteristic (2). Furthermore, we show that the photophobic reactions of *Euglena* involves various survival strategies such as adaptation to blue-light or awakening from dormancy, which can extend the performance of *Euglena*-based neurocomputing toward deadlock
